

Write an email to us([hackerfabiiitb@gmail.com](mailto:hackerfabiiitb@gmail.com)) with the subject "Recruitment- Your Name"

The email should be no longer than 1000 words and should contain the following:

1. Tell us about yourself - Who you are, what your story is so far and what are the things you're curious and passionate about? Make sure to include your branch, programme and year of study here - and talk a little about how you've spent your time in college so far.
2. Why do you want to join HackerFab IITB?
3. Tell us about your long-term and short-term goals. Short term, within your time in IITB, and long term, beyond. It's alright if they aren't well-formed or definitive.
4. What is your favourite part of the fabrication process and why?
5. Tell us in short about what technical skills you have.
6. Tell us about something you've built (preferably hardware). Also provide links to any work you mention.
7. Tell us about something you dream about building? Be descriptive. What is it? Why does it matter? How would you go about building it? What skills would you need to acquire to build this and how would you do the same?
8. Anything else you want us to know
